establishing a printer driver preference set at a first client computer for sending a first print job to an output device;
sending the set from the first client computer to a second client computer;
automatically modifying a printer driver preference within the sent set at the second client computer; and
using the set at the second client computer to send a second print job to the output device.

2-3. (Cancelled).

4. (Currently Amended) ~~The process of Claim 1~~ A process comprising:
establishing a printer driver preference set at a first client computer for sending a first print job to an output device;
sending the set from the first client computer to a second client computer;
modifying a printer driver preference within the sent set at the second client computer, wherein modifying is performed through interaction with a client user at the second client computer; and
using the set at the second client computer to send a second print job to the output device.

5. (Currently Amended) ~~The process of Claim 1, wherein the output device is~~ A process comprising:
establishing a printer driver preference set at a first client computer for sending a first print job to a printer;
sending the set from the first client computer to a second client computer;
modifying a printer driver preference within the sent set at the second client

computer; and

using the set at the second client computer to send a second print job to the printer.

6. (Currently Amended) A process comprising:
establishing a printer driver preference set at a first client computer for
sending a first print job to a first output device having a first feature set;
sending the printer driver preference set from the first client computer to a
second client computer;
automatically modifying a printer driver preference within the sent set; and
using the printer driver preference set at the second client computer to send
a second print job to a second output device having a second feature set.

7-8. (Cancelled).

9. (Currently Amended) ~~The process of Claim 6~~ A process comprising:
establishing a printer driver preference set at a first client computer for
sending a first print job to a first output device having a first feature set;
sending the printer driver preference set from the first client computer to a
second client computer;
modifying a printer driver preference within the sent set, wherein modifying
is performed through interaction with a client user at the second client computer; and
using the printer driver preference set at the second client computer to send
a second print job to a second output device having a second feature set.

10. (Currently Amended) ~~The process of Claim 6~~ A process comprising:
establishing a printer driver preference set at a first client computer for
sending a first print job to a first output device having a first feature set;
sending the printer driver preference set from the first client computer to a
second client computer;
modifying a printer driver preference within the sent set, wherein modifying
includes keyword matching between the first feature set and the a second feature set of a

second output device; and

using the printer driver preference set at the second client computer to send a second print job to the second output device.

11. (Currently Amended) ~~The process of Claim 6~~ A process comprising:
establishing a printer driver preference set at a first client computer for sending a first print job to a first output device having a first feature set;
sending the printer driver preference set from the first client computer to a second client computer;
modifying a printer driver preference within the sent set, wherein modifying includes resolution of conflicts between the first feature set and the a second feature set of a second output device; and
using the printer driver preference set at the second client computer to send a second print job to the second output device.

12. (Currently Amended) ~~The process of Claim 6, wherein the first output device is~~ A process comprising:
establishing a printer driver preference set at a first client computer for sending a first print job to a printer having a first feature set;
sending the printer driver preference set from the first client computer to a second client computer;
modifying a printer driver preference within the sent set; and
using the printer driver preference set at the second client computer to send a second print job to an output device having a second feature set.

13. (Currently Amended) ~~The process of Claim 6~~ A process comprising:
establishing a printer driver preference set at a first client computer for sending a first print job to a first output device having a first feature set;
sending the printer driver preference set from the first client computer to a second client computer;
modifying a printer driver preference within the sent set; and
using the printer driver preference set at the second client computer to send

a second print job to a second output device having a second feature set, wherein the second feature set is different from the first feature set.

14-20. (Canceled).
